

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. Appl. No. 09/487,239

5. (Amended) A container holding an adsorbent, said container being made of a laminate according to any one of claims 2 to 4, and holding the adsorbent.

6. (Amended) A container holding an adsorbent, said container being made of a laminate which comprises an ultra high molecular weight polyolefin porous film and a polytetrafluorethylene porous film, wherein at least two laminates are joined.

**Please add the following new claims 9-11:**

9. (New) The container according to claim 6, wherein said ultra high molecular weight polyolefin porous film is an ultra high molecular weight polyethylene porous film.

10. (New) The container according to claim 6, wherein said ultra high molecular weight polyolefin porous film has a structure in which ultra high molecular weight polyolefin particles are linked together, forming pores among them.

11. (New) The container according to claim 9, wherein said ultra high molecular weight polyolefin porous film has a structure in which ultra high molecular weight polyolefin particles are linked together, forming pores among them.
